Subject Index of Volume 167

Alloys
  diffusion along nonequilibrium grain boundaries in a nickel-base superalloy, 123
  energy and structural simulations of the interaction between the grain boundary and dislocations in Ni_3Al alloys, 165
  high resolution electron microscopy study of defects in an f.c.c. phase formed by ingot casting in Al–Li–Cu–Mg alloys, L1
  interfaces in alumina-fibre-reinforced aluminium piston alloys, 129
  low cycle fatigue damage in nickel-base superalloy single crystals at elevated temperature, 23
  mechanism of r.f. plasma nitriding of Ti–6Al–4V alloy, 155
  nitrogen effect on elastic constants of f.c.c. Fe–18Cr–19Mn alloys, 81
Alumina
  cracking and delamination of metal organic vapour deposited alumina and silica films, 179
  interfaces in alumina-fibre-reinforced aluminium piston alloys, 129
Aluminium
  a new method for activation volume measurements: application to $Ni_3(Al,Hf)$, 73
  creep and microstructural stability of dispersion strengthened Al–Fe–V–Si–Er alloy, 11
  energy and structural simulations of the interaction between the grain boundary and dislocations in Ni_{3Al} alloys, 165
  high resolution electron microscopy study of defects in an f.c.c. phase formed by ingot casting in Al–Li–Cu–Mg alloys, L1
  interfaces in alumina-fibre-reinforced aluminium piston alloys, 129
  mechanism of r.f. plasma nitriding of Ti–6Al–4V alloy, 155
  solid state solubility of aluminum in the δ-Ni_2Si nickel silicide, 147
Amorphous powders
  microstructural characteristics of plasma spray consolidated amorphous powders, 1

Carbon
  r.f. magnetron sputtered iridium coatings on carbon structural materials, 187
Ceramics
  cracking and stress redistribution in ceramic layered composites, 57
Chromium
  creep and creep fracture of an oxide-dispersion-strengthened 13% chromium ferritic steel, 65
  nitrogen effect on elastic constants of f.c.c. Fe–18Cr–19Mn alloys, 81
Coatings
  r.f. magnetron sputtered iridium coatings on carbon structural materials, 187
Composites
  an analysis of the critical conditions for diffusion-induced void formation in Ni–Cu laminate composites, 139
  crack and stress redistribution in ceramic layered composites, 57
  thermal residual stresses in particle-reinforced viscoplastic metal matrix composites, 97
Copper
  an analysis of the critical conditions for diffusion-induced void formation in Ni–Cu laminate composites, 139
  effect of ramp-treatment on the cyclic stress–strain curve of "small grained" copper, 37
  high resolution electron microscopy study of defects in an f.c.c. phase formed by ingot casting in Al–Li–Cu–Mg alloys, L1
Cracking
  cracking and delamination of metal organic vapour deposited alumina and silica films, 179
  cracking and stress redistribution in ceramic layered composites, 57
  evaluation of fatigue-crack initiation at inclusions in fully pearlitic steels, 107
Creep
  creep and creep fracture of an oxide-dispersion-strengthened 13% chromium ferritic steel, 65
  creep and microstructural stability of dispersion strengthened Al–Fe–V–Si–Er alloy, 11
  the influence of subgrain boundary migration on modeling of the response to stress change in creep, 31
Crystals
  dipole dislocation structures in ionic crystals, 47
  low cycle fatigue damage in nickel-base superalloy single crystals at elevated temperature, 23

Defects
  high resolution electron microscopy study of defects in an f.c.c. phase formed by ingot casting in Al–Li–Cu–Mg alloys, L1
Delamination
  cracking and delamination of metal organic vapour deposited alumina and silica films, 179
Diffusion
  an analysis of the critical conditions for diffusion-induced void formation in Ni–Cu laminate composites, 139
  diffusion along nonequilibrium grain boundaries in a nickel-base superalloy, 123
Dislocation
  dipole dislocation structures in ionic crystals, 47
Dislocations
  energy and structural simulations of the intersection between the grain boundary and dislocations in Ni_3Al alloys, 165
Dispersion strengthening
  creep and microstructural stability of dispersion strengthened Al–Fe–V–Si–Er alloy, 11

Elasticity
  nitrogen effect on elastic constants of f.c.c. Fe–18Cr–19Mn alloys, 81

Fatigue
  evaluation of fatigue-crack initation at inclusions in fully pearlitic steels, 107

low cycle fatigue damage in nickel-base superalloy single crystls at elevated temperature, 23
Ferrite
creep and creep fracture of an oxide-dispersion-strengthened 13% chromium ferritic steel, 65
Fibre reinforcement
interfaces in alumina-fibre-reinforced aluminium piston alloys, 129
Fibres
a study on the development of mullite fibers using the sol–gel process, 171
Fracture
creep and creep fracture of an oxide-dispersion-strengthened 13% chromium ferritic steel, 65

Grain boundaries
diffusion along nonequilibrium grain boundaries in a nickel-base superalloy, 123
energy and structural simulations of the interaction between the grain boundary and dislocations in Ni_3Al alloys, 165

Hafnium
a new method for activation volume measurements: application to $Ni_3(Al,Hf)$, 73

Interfaces
interfaces in alumina-fibre-reinforced aluminium piston alloys, 129
Iridium
r.f. magnetron sputtered iridium coatings on carbon structural materials, 187
Iron
creep and microstructural stability of dispersion strengthened Al–Fe–V–Si–Er alloy, 11
nitrogen effect on elastic constants of f.c.c. Fe–18Cr–19Mn alloys, 81

Lamellar eutectics
spacing selection for a Sn–Pb lamellar eutectic during directional solidification, 87
Laminates
an analysis of the critical conditions for diffusion-induced void formation in Ni–Cu laminate composites, 139
Laser processing
analysis of residual stresses induced by laser processing, 115
Lead
spacing selection for a Sn–Pb lamellar eutectic during directional solidification, 87
Lithium
high resolution electron microscopy study of defects in an f.c.c. phase formed by ingot casting in Al–Li–Cu–Mg alloys, L1

Magnesium
high resolution electron microscopy study of defects in an f.c.c. phase formed by ingot casting in Al–Li–Cu–Mg alloys, L1
Magnetron sputtering
r.f. magnetron sputtered iridium coatings on carbon structural materials, 187
Manganese
nitrogen effect on elastic constants of f.c.c. Fe–18Cr–19Mn alloys, 81
Martensite
intrinsic thermal–mechanical behaviour associated with the stress-induced martensitic transformation in NiTi, 51
Metal matrix composites
thermal residual stresses in particle-reinforced viscoplastic metal matrix composites, 97
Metals
cracking and delamination of metal organic vapour deposited alumina and silica films, 79
Mullites
a study on the development of mullite fibers using the sol–gel process, 171

Nickel
a new method for activation volume measurements: application to $Ni_3(Al,Hf)$, 73
an analysis of the critical conditions for diffusion-induced void formation in Ni–Cu laminate composites, 139
diffusion along nonequilibrium grain boundaries in a nickel-base superalloy, 123
energy and structural simulations of the interaction between the grain boundary and dislocations in Ni_3Al alloys, 165
intrinsic thermal-mechanical behaviour associated with the stress-induced martensitic transformation in NiTi, 51
low cycle fatigue damage in nickel-base superalloy single crystals at elevated temperature, 23
solid state solubility of aluminum in the δ-Ni_2Si nickel silicide, 147
Nitrogen
nitrogen effect on elastic constants of f.c.c. Fe–18Cr–19Mn alloys, 81

Oxide dispersion
creep and creep fracture of an oxide-dispersion-strengthened 13% chromium ferritic steel, 65

Particle reinforcement
thermal residual stresses in particle-reinforced viscoplastic metal matrix composites, 97
Pistons
interfaces in alumina-fibre-reinforced aluminium piston alloys, 129
Plasma nitriding
mechanism of r.f. plasma nitriding of Ti–6Al–4V alloy, 155
Plasma spraying
microstructural characteristics of plasma spray consolidated amorphous powders, 1

Silica
cracking and delamination of metal organic vapour deposited alumina and silica films, 179
Silicon
creep and microstructural stability of dispersion strengthened Al–Fe–V–Si–Er alloy, 11
solid state solubility of aluminum in the δ-Ni_2Si nickel silicide, 147
Sol–gel process
a study on the development of mullite fibers using the sol–gel process, 171
Solidification
spacing selection for a Sn–Pb lamellar eutectic during directional solidification, 87
Steels
creep and creep fracture of an oxide-dispersion-strengthened 13% chromium ferritic steel, 65
evaluation of fatigue-crack initiation at inclusions in fully pearlitic steels, 107

Strain
effect of ramp-treatment on the cyclic stress–strain curve of "small grained" copper, 37
Stress
analysis of residual stresses induced by laser processing, 115
cracking and stress redistribution in ceramic layered composites, 57
effect of ramp-treatment on the cyclic stress–strain curve of "small grained" copper, 37
intrinsic thermal–mechanical behaviour associated with the stress-induced martensitic transformation in NiTi, 51
the influence of subgrain boundary migration on modeling of the response to stress change in creep, 31
thermal residual stresses in particle-reinforced viscoplastic metal matrix composites, 97
Subgrain boundaries
the influence of subgrain boundary migration on modeling of the response to stress change in creep, 31
Tin
spacing selection for a Sn–Pb lamellar eutectic during directional solidification, 87
Titanium
intrinsic thermal–mechanical behaviour associated with the stress–induced martensitic transformation in NiTi, 51
mechanism of r.f. plasma nitriding of Ti–6Al–4V alloy, 155
Vanadium
creep and microstructural stability of dispersion strengthened Al–Fe–V–Si–Er alloy, 11
mechanism of r.f. plasma nitriding of Ti–6Al–4V alloy, 155
Vapour deposition
cracking and delamination of metal organic vapour deposited alumina and silica films, 179
Viscoplastics
thermal residual stresses in particle-reinforced viscoplastic metal matrix composites, 97
